Gianni Pasquinelli

Frontend Engineer | Gen AI Dev | React | JavaScript | TypeScript | CSS | Tailwind | UX UI | SDD | Web Developer
Greater Rosario

Summary

I'm a Frontend / UI Engineer with over 5 years of experience building high-quality interfaces for digital products, combining technical precision with a strong aesthetic sense. I specialize in crafting smooth, consistent, and scalable experiences where every interaction has a purpose and every detail adds value to the user.
I primarily work with React, TypeScript, JavaScript, CSS, and Tailwind, applying best practices in frontend architecture, clean code, and performance optimization. I have a solid focus on design systems, visual consistency, and building reusable components that stand the test of time. My edge lies at the intersection of technology and creativity. I come from a background in music composition and teaching, which gives me a unique perspective on rhythm, composition, and user experience. This translates into interfaces that not only work well, but feel right — clear, intentional, and refined.
I particularly enjoy working on high-fidelity design implementation, layout refinement, and developing microinteractions that elevate the user experience. I actively collaborate with design and product teams to ensure technical execution enhances and respects the product vision. Main stack: React, TypeScript, JavaScript (ES6+), CSS, Tailwind CSS, Motion, Three.js.Focus: accessibility, performance, and visual quality as core aspects of development. I'm interested in joining teams where user experience and visual quality are real priorities, and where frontend plays a strategic role in the product.
You can reach me at: giannipasquinelli@gmail.com

Experience

Holocruxe
Product Engineer
August 2025 - Present (1 year)

• Led end to end development of landing pages and brand aligned interfaces, combining product thinking, frontend architecture, and AI assisted workflows

• Introduced spec driven development practices to define UI specifications before implementation, reducing ambiguity and improving delivery speed
• Leveraged AI to explore and refine UI systems, content, and brand direction, accelerating iteration while maintaining consistency
• Designed and implemented +15 reusable React components using TypeScript and Tailwind, improving scalability and reducing development time by 20%
• Led frontend refactoring initiative, reducing duplicated code by 30% and improving team efficiency by 40%
• Collaborated closely with product and design to align UX decisions with business goals

Avature

1 year 7 months

Frontend Engineer

December 2024 - September 2025 (10 months)
Rosario, Santa Fe, Argentina

• Delivered more than 100 client customizations with high 90% first attempt success rate in a large scale SaaS environment
• Built more than 20 client portals including full end to end implementations with strong focus on performance, accessibility, and design fidelity
• Worked cross functionally with product, design, and QA to detect inconsistencies early and reduce rework in production
• Maintained consistency across implementations by applying structured development practices and reusable patterns
• Contributed to improving delivery quality in enterprise level recruiting platforms

Style Specialist

March 2024 - December 2024 (10 months)
Rosario, Santa Fe, Argentina

Responsible for implementing and maintaining styles on websites using pure CSS and internal libraries.

Developed HTML email templates compatible with multiple email clients.

Worked in a collaborative environment, applying Agile methodologies for project delivery.

Holocruxe

8 months

Frontend Web Developer Core Team
November 2023 - March 2024 (5 months)

Contributed to the development of a web platform using Next.js, TypeScript.

Conducted performance optimization to ensure a smooth and fast user experience.

Collaborated with designers and developers to implement scalable and user-centered interfaces.
Developed an interactive 3D model using Three.js and Blender, creating an engaging and dynamic product visualization.

Collaborated closely with design and QA teams, ensuring high-quality visual implementation and functional accuracy across devices.

Frontend Web Developer
August 2023 - December 2023 (5 months)

Refactored the company’s Landing Page using Next.js and Material UI, improving Core Web Vitals from 50 to 86 and reducing load time by ~4 seconds, significantly enhancing performance and user experience.

Integrated Google Analytics and Hotjar to enable user behavior tracking and future data-driven design decisions.

Focus On Kids
2 years 3 months

Frontend Developer
January 2023 - August 2023 (8 months)
Comodoro Rivadavia, Chubut, Argentina

Led a cross-functional team of a UI/UX designer, PM, and another developer to build a new React website from scratch, delivering within the planned timeline.

Developed a 10-page responsive website aligned with the company’s rebranding and visual identity.

Increased company visibility and client inquiries by ~30%, while improving overall SEO performance and Google ranking.

Implemented performance optimization and cross-browser compatibility best practices, ensuring smooth user experience across devices.

Collaborated in Agile sprints, maintaining consistent delivery and high design fidelity throughout development.

Administrative Director
June 2021 - August 2023 (2 years 3 months)
Comodoro Rivadavia, Chubut, Argentina

Digitized and optimized the clinic’s administrative processes, implementing efficient management systems.

Managed communication with families and insurance providers, ensuring high-quality service.

Global Commerce Media GmbH
Content writer
September 2021 - December 2021 (4 months)

Completed a digital marketing internship, focusing on creating SEO-optimized content.

Researched, wrote, and designed articles for Amazon Affiliate, ensuring content was optimized for search engines.

Used tools like WordPress for content publishing and management.

Developed skills in market research, customer relationship management (CRM), and web content writing.

Onlines & co.
Web developer
November 2020 - August 2021 (10 months)

Took my first steps in web development, gaining knowledge in HTML5, CSS, JavaScript, and WordPress.

Participated in practical projects that allowed me to apply web design and development concepts.

This experience opened the doors to the world of frontend development and laid the foundation for my professional career.

Funes Art

Musical teacher

March 2009 - March 2020 (11 years 1 month)

Funes

Taught electric guitar, ear training, and harmony to students of various levels.

Developed skills in creativity, music composition, and education, adapting teaching methods to each student’s needs.

Promoted practical and theoretical learning, helping students achieve their musical goals.
